

### Academic Advisory

Students are assigned **academic advisors** who guide them on matters regarding their studies. The advisors are experienced instructors well versed in general matters of university education and have the necessary professional requirements.

The students are required to maintain regular contact with their advisors who will subsequently update the departments and schools on the students' performance.

In case you wish to know who your academic advisor is, please get in touch with your respective Chair of Department (CoD). Their emails are provided below:
